📍 Chennai, India – 600032

PROFESSIONAL SUMMARY

Experienced Cloud Professional with 6+ years of experience in optimizing Development and Data engineering methodologies. Skilled in automating CI/CD pipelines, infrastructure as code, and leveraging cloud technologies for efficient and reliable deployments. Proven ability to collaborate cross-functionally, optimizing development processes for accelerated time-to-market. Dedicated to continuous learning and staying updated on emerging technologies to drive ongoing improvement in DevOps practices

EDUCATION

SRI KRISHNA ARTS AND SCIENCE COLLEGE – Coimbatore, TamilNadu
Master of Science – Software Systems – 8.5 CGPA (April 2019)

CERTIFICATIONS

- ❖ **AWS Developer** | [Certifications](#)
- ❖ **AWS Cloud Practitioner** | [Certifications](#)

CORE SKILLS

- ❖ **Programming Language:** Python, PySpark, Terraform, Shell-Script, Yaml
- ❖ **Database:** MySQL
- ❖ **Integrating:** Jenkins, GitHub Actions
- ❖ **Cloud:** AWS
- ❖ **Versioning Tools:** GitLab, GitHub & Bitbucket
- ❖ **Ticketing Tools:** Service-Now, Zendesk
- ❖ **Monitoring Tools:** AWS CloudWatch (Dashboards)
- ❖ **Basic Knowledge on RAG's and AWS Bedrock**

WORK EXPERIENCE

- HTC Global Service – Platform Engineer, Statefarm** **[Sep 2021 – Present]**
- ❖ Providing the permission to the consumer, to access the data and building up the cross-account functionality from the Lake Account
- NanoNino – Associate Engineer, FedEx** **[Nov 2019 – SEP 2021]**
- ❖ Monitoring the relational database count and generating the reports for the image by publishing through the CloudFront
- Sun Software Solutions – System Administrator** **[Apr 2019 – Nov 2019]**
- ❖ Backup & restoring the system and migrating the server to the AWS instance

PROJECTS

Project: Statefarm

Environments: [AWS, API-Gateway, Lambda, Terraform, Cloud-ERA, GitLab, PySpark, ServiceNow, And Unix/Linux]

Roles & Responsibility:

- ❖ Orchestrated enterprise-scale data migration from on-premises to AWS, architecting Glue jobs, Athena analytics pipelines, and Lake Formation access controls with cross-account resource linking
- ❖ Architected AWS Step Functions and REST APIs with Lambda to orchestrate complex workflows and seamlessly expose analytics results to downstream consumers
- ❖ Automated QuickSight user provisioning and data ingestion pipelines using Boto3, Lambda, and CloudTrail integration for intelligent role mapping and business intelligence consumption

Project: Disney

Environments: [AWS, API-Gateway, Lambda, Terraform, GitHub, Docker, HashiCorp-Vault, ServiceNow, Unix/Linux, And Python Client]

Roles & Responsibility:

- ❖ Spearheaded fast Api application deployment and cluster resource optimization through Jenkins-integrated CI/CD pipelines; engineered Terraform infrastructure-as-code solutions achieving 30% reduction in deployment cycles
- ❖ Implemented comprehensive monitoring architecture using Prometheus, Grafana, and Kubecost; configured CloudWatch Metric Alarms with Teams alerting for real-time incident detection
- ❖ Deployed OpenID Connect authentication with AWS, integrated Checkov for cloud infrastructure security assessment, and executed Blue-Green deployment strategy for zero-downtime releases

Project: Arun Cable System (Single Page Application) – Freelancing project

Link: [ArunCommunicationSystem](#)

Environments: [Compute Engine, GCP, JavaScript, HTML, CSS, Flask, MySQL, GitHub Actions, Jenkins and Unix/Linux, Google Sheets (Data-Analysis)]

CI/CD Pipeline for Static Website

- ❖ Deployed and managed virtual machines on GCP using Compute Engine
- ❖ Configured web server on a Linux VM to host a dynamic website
- ❖ Implemented secure SSH access, firewall rules, and persistent disk storage for web hosting
- ❖ Implementing Twilio functionality to get the notification, if any one raises the query regarding for Issue or New Connection

Migration (Moving to Free of Cost Service Charged for Only Domain Name)

- ❖ Migrated to lambda function using Zappa third party tool under aws-cli
- ❖ Integrating Proxy using API-Gateway pointing towards to lambda function
- ❖ Redirecting URL to the custom-domain using A, CNAME records
